

**ZERA**

Precision starts with us

We are the **preferred** and **independent** partner  
for energy meter testing **worldwide**

## We are the preferred and independent partner for energy meter testing worldwide

ZERA develops and manufactures systems for producing, measuring, testing and calibrating electrical quantities and sells them worldwide.

Renowned utilities as well as meter and instrument transformer manufacturers are among our customers. ZERA is an independent company, led by its employees.

## ZERA on its way to becoming the world market leader

**1920**

Foundation

First export activities  
**1931**

**1946**

First post-war contract

Electro-mechanical fault indicator  
**1950**

**1972**

First electronic Reference Meter EPZ

Single-phase thermal Comparator ILM  
**1981**

**1990**

First digital system using PC/DOSSAM

Highly accurate, 3-ph comparator with digital technology  
COM3003  
**1998**

**2001**

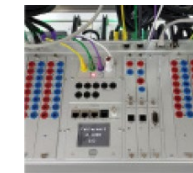

Transformation in an employee-led company

## ZERA during the digital age

Foundation of a subsidiary in India  
**2005**

First measuring device for different types of instrument transformers WM3000  
**2010**

Comparator COM5003, class 0.005  
**2016**

First digital measuring system of the STM6000 series  
**2018**

Moving to the new location  
**2019**

**2004**  
reddot design award for the first modular and portable system MT3000

reddot award 2004  
best of the best

**2008**  
Development of PPCS for metrological institutes

**2015**  
First Test System for Smart Meter

**2017**  
Foundation of ZERYCON GmbH

**2019**  
Start of the s2 series

## ZERA during the digital age

First test case for testing charging station for electric vehicles

**2022**

**2020**

Anniversary  
100 years

**100**  
*years of precision*

## ZERA in figures

founded  
**1920**

Export ratio  
more than  
**80%**

More than **100** employees

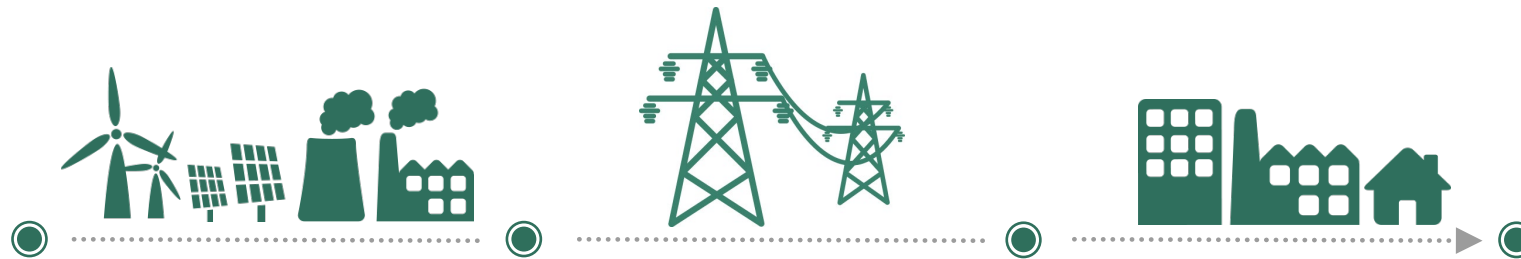

Sales of approximately  
**17 – 18 Mio. €**  
p.a.

Customers in more than **160** countries

More than **80** representatives worldwide

### Production

Installations of highly precise meters and instrument transformers in power plants

### Transmission

Transfer stations between different networks

### Customers

Meter and instrument transformer installations on customer's premises

- Utilities
- Meter and transformer manufacturer
- Test laboratories
- Metrological institutes and notified bodies
- Universities
- Research institutes

### Advantages

#### Consumer protection

Billing on customer and supplier

#### Quality assurance

Compliance of standards

#### Maximizing of revenues

Lost on utility sides

Thinking locally –  
acting internationally

Convincing by  
comprehensive service range

Technology and quality  
„Made and Managed in Germany“

Fair, precise and customer-oriented

Focused and market-leading

Independent,  
employee-led and cooperative

## Our Vision and Strategy

Utilities, test laboratories as well as meter and transformer manufacturers from all over the world
